

Ultra Slim Garden Tank and Leaf Filter

A no compromise 235 litre rainwater storage tank, self install water outlet fitting for a tap or hose connection and downpipe diverter and leaf strainer.

This Super Slim Tank is the narrowest high capacity garden tank available and its unique design makes it very space efficient and visually discreet. Multiple tanks can be joined together with a connection kit provided to increase storage capacity. It is easy to install and highly durable.

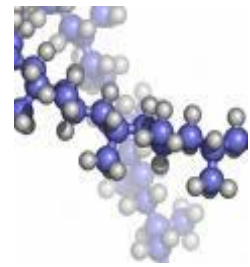

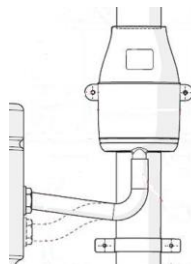

The Super Slim Garden Tank offers the following benefits compared with a conventional water butt.

- **Super slim tank**, each 180 x 80 x 20cm including steel fixing frame, capacity nominally 235 litres.
- **Modular design**, for either single or multiple tank installation. Tank coupling kit available on request.

- **Visually discreet**, slim profile making it ideal for installation along side walls and in narrow passages. Simple to screen or otherwise camouflage.
- **Easy to install**, using DIY tools.
- **Proven and reliable filter diverter**, fits downpipe up to 80 mm dia.
- **Child Proof design**, no removable cover.

The Super Slim Garden Tank is manufactured to the highest standards using advanced technology and incorporates;

- An opaque high density polyethylene.
- A stabilizer for added high level UV protection.
- A steel support frame for permanent and secure installation.

About Halsted Rain

Halsted Rain is a supplier of urban rainwater harvesting and grey water recycling. We offer a range of modular tanks, filters, pumps, mains top up kits and treatment units designed for installation above and below ground that offer simple and affordable solutions when space and access is restricted or ground conditions are poor. Our products are ideally suited for residential and light commercial property particularly as a retrofit solution.
